

The ON TRACK Network Trial Development Workshop

Developing Maternal & Perinatal clinical trials

Workshop Aim: This interactive and collaborative workshop aims to develop promising clinical trial concepts for collaborative, multicentre, investigator-driven research projects in maternal and perinatal health to a level suitable for competitive grant applications (e.g. Health Research Council grants).

Who Should Attend? We welcome trial investigators & collaborators, interested potential collaborators, emerging researchers, clinicians, scientists, consumers interested in maternal and perinatal health and anyone wanting to gain knowledge and skill in the process of clinical trial development to attend this workshop.

Why Attend?

If you are interested in maternal and perinatal health research we invite you to join us! This will be a valuable opportunity to be part of developing new multicentre trials and will equip you with knowledge and opportunities to move your research into the trial development phase. Learn from experts, meet potential collaborators and help progress priority research questions in maternal and perinatal health.
