**Everything you should know about the coronavirus outbreak**
The latest information about the novel coronavirus identified in Wuhan, China, and advice on how pharmacists can help concerned patients and the public.

**We designed a new way of tapering antidepressants, but why won't the health authorities recognise its value?**
When Peter Groot, a researcher in mental health experience, suffered uncomfortable withdrawal symptoms from his antidepressants, he set about developing tapering strips — clever tools to help patients gradually reduce their dose. But, despite their effectiveness, they are yet to take the medical community by storm.

**Everything you need to know about the COVID-19 therapy trials**
Researchers around the world are working at record speed to find the best ways to treat and prevent COVID-19, from investigating the possibility of repurposing existing drugs to searching for novel therapies against the virus.

**Personalised medicine approach could benefit people with asthma**
Prescribing asthma treatment based on genetic differences could improve outcomes, results presented at the European Respiratory Society International Congress have suggested.

**Case-based learning: constipation in adults**
It is important that pharmacists understand how to appropriately and safely manage patients with constipation in light of new Medicines and Healthcare products Regulatory Agency guidance announced in August 2020.

**Nightingale hospital pharmacy lead among recipients of Queen’s birthday honours**
The 2020 Queen’s birthday honours list focused on frontline responders and community volunteers during the COVID-19 pandemic, including the lead pharmacist for the Nightingale Hospital in London.

**Welsh pharmacy flu vaccinations increase ten-fold on same period last year**
Community pharmacies in Wales delivered ten times more flu vaccines in September 2020 compared with the same month in 2019.
